

USB to Serial Adaptor Kit (Part No. 714A7001)

Purpose

This technical bulletin describes the installation of the USB to Serial Adaptor Kit (Part No. 714A7001). The Adaptor Kit allows for all **Instantel Series III** and **Series IV** vibration monitors, which use serial communication protocols, to communicate with computers that support USB 2.0 communication protocols. Instantel has selected an Original Equipment Manufacturer (OEM) device for this purpose (Image A).

Equipment Required

1. An **Instantel Series III** or **Series IV** vibration and overpressure monitor,
2. A computer with a Windows 2000, XP, or 7 Operating System with **Instantel Blastware®** installed,
3. The USB to Serial Adaptor Kit (Part No. 714A7001) (Image A, and B—Contents), and
4. An Instantel Serial Communication Cable (Image C):
 - a) **Series III** Serial Communication Cable (Part No. 712A2301), or
 - b) **Series IV** Serial Communication Cable (Part No. 720A3101).

3. Firmly pressfit the Instantel Serial Communication Cable (Image C, Part No. 720A3101 or 712A2301) into the USB to Serial Adaptor Cable (Part No. 71407001). The fastening screws on the Serial Communications Cable and USB Serial Adaptor are not intended to be used and will not fasten together (Image D). Refer to Image E and F which shows the complete installation.
4. **IMPORTANT:** Check the pressfit regularly during use to ensure a proper fit exists at all times. Failure to do so may result in loss of data.
