

Web Based Vibration Monitoring

Range of Applications:

- Remote monitoring using Auto Call Home™ and InstaLink™
- Gather and view data from a remote site on a central, secure server
- Large projects with multiple monitoring locations
- Project Stakeholders are informed in real time

It's about time. Your time.

InstaLink™ from InstanTel is a web based monitoring solution that allows you to satisfy the most demanding reporting requirements, effortlessly and cost effectively.

Now you can have safe and secure 24/7 access to your vibration data via the Internet.

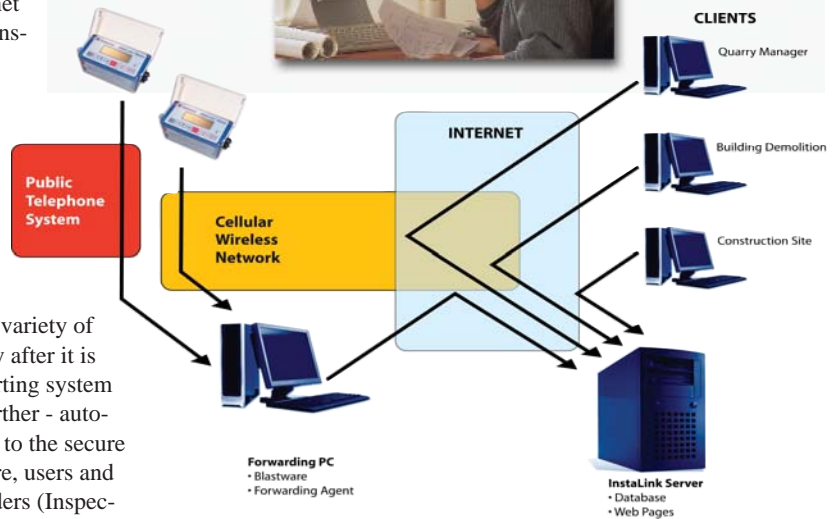

InstaLink is the perfect extension for your InstanTel equipment saving you valuable time like never before.

Leverage the Internet

InstaLink leverages the Internet to automate the process of transferring vibration data directly from an InstanTel vibration monitor to a secure, password-protected web site for viewing by approved stakeholders. Using the popular InstanTel Auto Call Home™ automated call-in feature allows InstanTel monitors to send vibration data through a variety of modems to a PC, immediately after it is recorded. The InstaLink reporting system takes this process one step further - automatically forwarding the data to the secure InstaLink database. Once there, users and their pre-authorized stakeholders (Inspectors, Project Engineers, Contractors, etc.) can log in and view vibration data from their project(s) through the user's own customized InstaLink website page.

Data – Anytime, Anywhere

Ideal for projects with time-sensitive reporting requirements to many stakeholders, or for sites that have many monitoring points, InstaLink provides users and their stakeholders with reliable and immediate distribution of their data as soon as it is collected.

Key Features

- Safe, secure, and reliable data management on an Internet accessible server, with a backup server, maintained by InstanTel.
- Only you and your approved clients can access and view the data 24/7 on your assigned, customized website.
- Automatic collection and distribution of event data in InstanTel's popular Event Report format; no traveling to retrieve event data, copying, printing, faxing, or emailing.
- Cost effective, providing you with a competitive edge with nominal monthly fees per active monitoring point; you establish your own fee structures.
