For immediate release

Your data, 24/7/365 from anywhere.

Take control of your monitoring projects—anytime, anywhere. Vision II is our next-generation, cloud-based platform that provides round-the-clock access to event data from any internet-connected device. Built for ease and efficiency, Vision II makes it simple to store, report, and analyze data captured by your Instantel monitoring units. With powerful tools like Live Data™, it streamlines your daily workflow, enhances decision-making, and keeps your entire project team informed—no matter where they are.

OTTAWA, ON — April 20, 2025- Instantel, a global leader in vibration, noise, and air overpressure monitoring, is proud to introduce Vision II, a powerful new cloud-based event data monitoring platform that brings real-time control and clarity to projects of any size—from anywhere, at any time.

Built with user experience at its core, Vision II enables seamless 24/7/365 access to critical event data on any internet-connected device. Whether managing a single job site or coordinating thousands, users can store, report, and analyze data collected from Instantel monitoring units through a secure and scalable platform designed to grow with their operations.

“Your data. 24/7/365. From anywhere. That’s the promise of Vision II,” said Brent Beninger, Director of R&D at Instantel. “The Vision II cloud platform is powered by world-class Microsoft Azure resources, providing cutting-edge cloud computing capabilities. It creates a streamlined vibration monitoring environment within a modern ecosystem. The platform offers the control and flexibility that monitoring professionals need to focus on effectiveness over effort.”

For over 40 years, Instantel has been a global leader with best-in-class vibration, noise and air overpressure equipment for quarries, mining, construction, civil, geotechnical and other applications. Our products have contributed to the success of our customers’ projects in over 85 countries and on countless sites. From specialized sensors and recording options, to remote data collection and a cloud-based data hosting solution, Instantel provides solutions that work. We are proud of our position as an industry leader, boasting many industry firsts, but it does not stop there. We are committed to continuous improvement through innovation. We understand that our customers face challenging environments daily and need reliable data fast to ensure the success of their projects. We specialize in providing the tools that complete each project safely, quickly, and within compliance. Our flexible product portfolio allows our customers to select the monitoring solution that best meets their needs — whether deep in the earth, above ground, or underwater.
